

# KEY FEATURES AND BENEFITS

## ABBYY FLEXICAPTURE 8.0 PROFESSIONAL

### Key Benefits of ABBYY FlexiCapture 8.0 Professional

Partners	End-Users
<ul style="list-style-type: none"> <li>■ Single product for any number of solutions: form processing, accounts payable automation, archiving, etc.</li> <li>■ Easy to switch to a new vertical application with new document types</li> <li>■ Easy to learn and demonstrate</li> <li>■ Sell and deploy solutions quickly</li> <li>■ Address application with very strong requirements to the quality of data</li> <li>■ Generate new revenue streams by providing customization and integration services</li> </ul>	<ul style="list-style-type: none"> <li>■ Single entry point for any kind of paper documents in one product</li> <li>■ Speed your business processes by automating them and eliminating manual data entry</li> <li>■ Rapid ROI and low total cost of ownership</li> <li>■ Reduce implementation, maintenance, and training costs</li> <li>■ Easily expandable: capture more types of documents all over the company</li> <li>■ Easy scalability across small workgroups</li> </ul>

### Key Features of ABBYY FlexiCapture 8.0 Professional

Feature	Description	Benefit for Partners	Benefit for End-Users
<b>Automated Classification and Processing Any Kind of Paper Documents in One Stream</b>	Structured, semi-structured and unstructured documents of any kind are automatically classified and processed in a single stream. Depending on the document type, specific data can be extracted, validated and exported to any repository or business application together with document images or searchable PDFs.	<ul style="list-style-type: none"> <li>■ Address many projects with a single product: form processing, accounts payable automation, archiving, etc.</li> <li>■ Provide flexible solutions for any specific set of customer documents without limitations of vertical applications</li> <li>■ Up-sell current FormReader customers to FlexiCapture supporting new documents types and supplying more seats.</li> </ul>	<ul style="list-style-type: none"> <li>■ Streamline business by using single and automated entry point for any kind of paper documents</li> <li>■ Save costs and speed up processing by eliminating manual pre-sorting and insertion of separator pages</li> <li>■ Start with one document and with one department, and then use the experience to easily expand the application area to capture other types of documents all over the company</li> </ul>
<b>Award-winning FlexiCapture Technology to Automate Capture of valuable Data from Semi-structured Documents</b>	The most powerful technology in the market to automatically and accurately locate and extract required data from documents with variable layouts of any complexity, including multi-paged documents with variable number of pages and continuous table elements.	<ul style="list-style-type: none"> <li>■ Address applications with semi-structured documents of any complexity</li> <li>■ Develop and sell own vertical applications for semi-structured documents in any industry</li> <li>■ Generate new revenue streams by expanding applications for new markets</li> </ul>	<ul style="list-style-type: none"> <li>■ Improve and streamline business processes by delivering data from various incoming documents including multi-paged invoices into corporate information systems</li> <li>■ Eliminate time-consuming and expensive manual keying and indexing</li> <li>■ Create a single FlexiLayout to handle a whole set of documents with different layouts</li> </ul>

## Key Features of ABBYY FlexiCapture 8.0 Professional continued

Feature	Description	Benefit for Partners	Benefit for End-Users
<b>Easy-to-use and ergonomic User Interface</b>	Maximum automation and simplification of both deployment and processing operations. Comfortable tools for administrators. Intuitive and ergonomic interfaces for operators on routing processes.	<ul style="list-style-type: none"> <li>■ Quickly set up pilot projects to proof the concepts</li> <li>■ Easy to learn and demonstrate</li> <li>■ Sell and deploy solutions quickly</li> <li>■ Quick and easy customize Operator's UI without needing programming skills</li> </ul>	<ul style="list-style-type: none"> <li>■ Easy set up and quick deployment</li> <li>■ Reduce implementation and maintenance costs</li> <li>■ Reduce training costs</li> <li>■ Increase efficiency of verification operations</li> <li>■ Low total cost of ownership</li> <li>■ Rapid ROI</li> </ul>
<b>Recognition Accuracy and Multi-language Support</b>	Award-winning OCR/ICR technologies provide high full-text recognition and data extraction quality of documents in 190+ languages.	<ul style="list-style-type: none"> <li>■ Address application with very strong requirements to the quality of data and the effectiveness of the whole process</li> <li>■ Address projects in global companies</li> </ul>	<ul style="list-style-type: none"> <li>■ Get most accurate data for business transactions</li> <li>■ Reduce time-consuming manual verification and correction operations</li> <li>■ Reduce QA staff costs</li> <li>■ Process multi-language documents in global companies</li> </ul>
<b>Network Capabilities</b>	Several desktop stations in the local network can access the same project or batch to parallelize processing. Concurrent licensing is used to coordinate the processing in a workgroup.	<ul style="list-style-type: none"> <li>■ Address both desktop users and small workgroups with a single product</li> <li>■ Up-sell opportunities: save on development time and easy upgrade your customers to higher volume just selling an additional license</li> </ul>	<ul style="list-style-type: none"> <li>■ Easy scale across small workgroups to accommodate growing processing volume</li> </ul>
<b>Scriptable Events</b>	Possibility to customize input, validation and output processes by using script languages.	<ul style="list-style-type: none"> <li>■ Provide completed integrated solution to customers</li> <li>■ Generate new revenue streams by providing integration services</li> </ul>	<ul style="list-style-type: none"> <li>■ Easy integrate into existing workflow</li> <li>■ Reduce implementation costs</li> <li>■ Simplify and speed up processing</li> </ul>
<b>Solution Protection</b>	Partners can protect their custom projects to enable secure distribution of their custom solutions to their customers.	<ul style="list-style-type: none"> <li>■ Protect IT, investments of time and effort in developing and selling own custom projects and vertical applications</li> </ul>
