Document Genetics Barcode Recognition Engine (BRE)

The **Document Genetics Barcode Recognition Engine (BRE)** is a highly accurate and powerful software module which recognizes 1-D and 2-D barcodes from digital images and bitmaps. Using the BRE, it's easy to collect barcoded documents from multiple scanners or digital copiers, recognize the contents of the barcode, then publish to a workflow or document management system.

The following image formats are supported: BMP, TIF, JPG, PNG and multipage TIF and PDF (Portable Document Format). The unique and fast barcode recognition algorithm searches for barcodes in any position and orientation from your images.

Barcode Reader returns the number of barcodes found and for each barcode:

- Barcode string
- Barcode type
- Barcode orientation
- Barcode location (start/stop bars coordinates)
- Page number (for multipage TIFF)

Supported 1-D barcodes:

- Code 11
- Code 39
- Code 93
- Code 128
- 2of5 Interleaved
- Codabar
- Patch Code
- EAN 8
- EAN 13
- UPC A
- UPC E
- Add 2
- Add 5
- PostNet
- RM4SCC

Supported Operating Systems:

- Windows 2000/XP

Supported 2-D barcodes:

- PDF417
- Data Matrix
- QR Code

Costs

Workstation License (Single) – require human interaction to start recognition process	£395
Workstation license (Site) – can be installed any number of times on a single site	£995
Server License (Single) – runs as a background service	£1,295

Productivity Tools – July 09

TIF to PDF

Windows Service which converts TIF files to PDFs.

Cost - £250.00 (Single License)

PDF Print

Standalone direct printing of PDFs or advanced meta data controlled printing of multiple PDFs to multiple printers.

Cost - £495.00 (Single License)

PDF Editing Utility

Windows application to provide a GUI to locate text coordinates within the first page of a PDF

Cost - £95.00 (Single License)

Tool only – No Support Available
