

Fax software solutions for business

Network fax software – from the fax experts

Equisys has been a leading global provider of fax software solutions for over 10 years. Zetafax has been selected by over 60,000 customers in 100 countries for its reliability, ease of use and simple manageability.

Zetafax for Networks provides versatile fax software solutions for small businesses, corporate offices and distributed enterprise businesses. You can also integrate Zetafax seamlessly into your existing applications, such as accounting or CRM systems, for fast, automated faxing from the desktop or back office.

For fax flexibility and control, trust Zetafax

“After testing seven fax server solutions, Ryanair chose Zetafax based on its cost, performance and ease of installation.”

Ryanair

From your PC at the desktop or on the road

Zetafax fits in with the way you want to work. Whether you send faxes from the stylish and intuitive Zetafax Client, your existing email client, Microsoft Office documents, or other applications, Zetafax is proven to save up to 80% on the time taken to send faxes ‘conventionally’, leading to cost savings that quickly repay your investment. For extra flexibility, Zetafax can also be used on your laptop away from the office.

Forget about wasting time at the fax machine

“The introduction of Zetafax has significantly reduced the time taken for information to reach our customers which in turn has increased staff productivity.”

Swiss Life

From your business existing applications

In many industry sectors faxing is a vital business communication tool. What’s more, faxing is often much more cost-effective than sending documents by post. Zetafax can be easily and quickly integrated with virtually any desktop or back office software application, for reliable, automated faxing from accounting, CRM, HR and other business systems.

For easy, straightforward faxing, look no further than Zetafax

Integration ready technology for fast time to market

Independent Software Vendors (ISVs) looking for new ways to add value to their products can integrate fax technology into any application quickly and easily using the Zetafax CommsEngine. Using CommsEngine technology to fax-enable your software, you can enhance and differentiate your products, reducing development costs – and speeding up time to market. For more information, see the Zetafax CommsEngine datasheet.

For dependable fax technology, you can rely on Zetafax.

“When we were looking for an integrated document output and fax solution, the Zetafax CommsEngine was the obvious choice. We were impressed by the range of methods available including the powerful COM API, which meant we could send a fax using less than 10 lines of code.”

Document Genetics

Zetafax for Networks – solutions for all sizes of organization

Business Edition: Smaller and medium sized businesses with 5-49 users

The Zetafax Business Edition starter system includes the Zetafax Server, clients for the stated number of users and support for two fax lines. It includes the Zetafax Email gateway, DDI routing, queue management, remote monitoring and report writing, providing a richly featured fax solution which scales easily.

Corporate Edition: Larger businesses with 50 or more fax users

In addition to the features of the Business Edition, the Zetafax Corporate Edition includes Least Cost Routing (LCR), support for Exchange clusters and Windows child domains for the Zetafax Email Gateway. It also includes Software Assurance for one year.

Enterprise Edition: Unlimited users and lines

For greatest flexibility, the Zetafax Enterprise Edition includes support for unlimited servers and lines. It also includes the SMS Gateway, API Toolkit, Document Conversion add-on for API, Email Gateway and Web Client and one year's Software Assurance.

Customization and integration services

Talk to Equisys or your Zetafax dealer about customizing Zetafax to suit your needs or to help you in integrating Zetafax into any of your business applications.

“Since the introduction of Zetafax, staff productivity has been maximized across the department.”

Your business

Zetafax does it all

Zetafax feature highlights

A wide range of fax client interfaces

- Intuitive Microsoft Outlook 2003-style fax client with address book, system tray alert, preview pane and full-feature toolbar and menu
- Zetafax Web Client for easy Zetafax use in an Intranet environment
- Microsoft Office add-ins for one-click faxing from any Office application
- Zetafax API available for integrating fax databases and other applications
- Inbound fax PDF conversion, so inbound faxes can be forwarded without the need to install a fax viewer application on the recipient's PC.

Fully flexible functionality

- Choice of addressing options including integrated Microsoft Outlook address books and Zetafax private and public address books
- Choice of manual or automated routing of inbound faxes. Support for DDI (personal fax numbers), BRI and PRI (digital fax lines) as standard (requires additional fax hardware)
- Fully scalable, supporting any number of users, servers and fax lines
- Supports a wide range of fax hardware including V.34 modems, ISDN adaptors and Intelligent Fax Boards.

Complete communications control

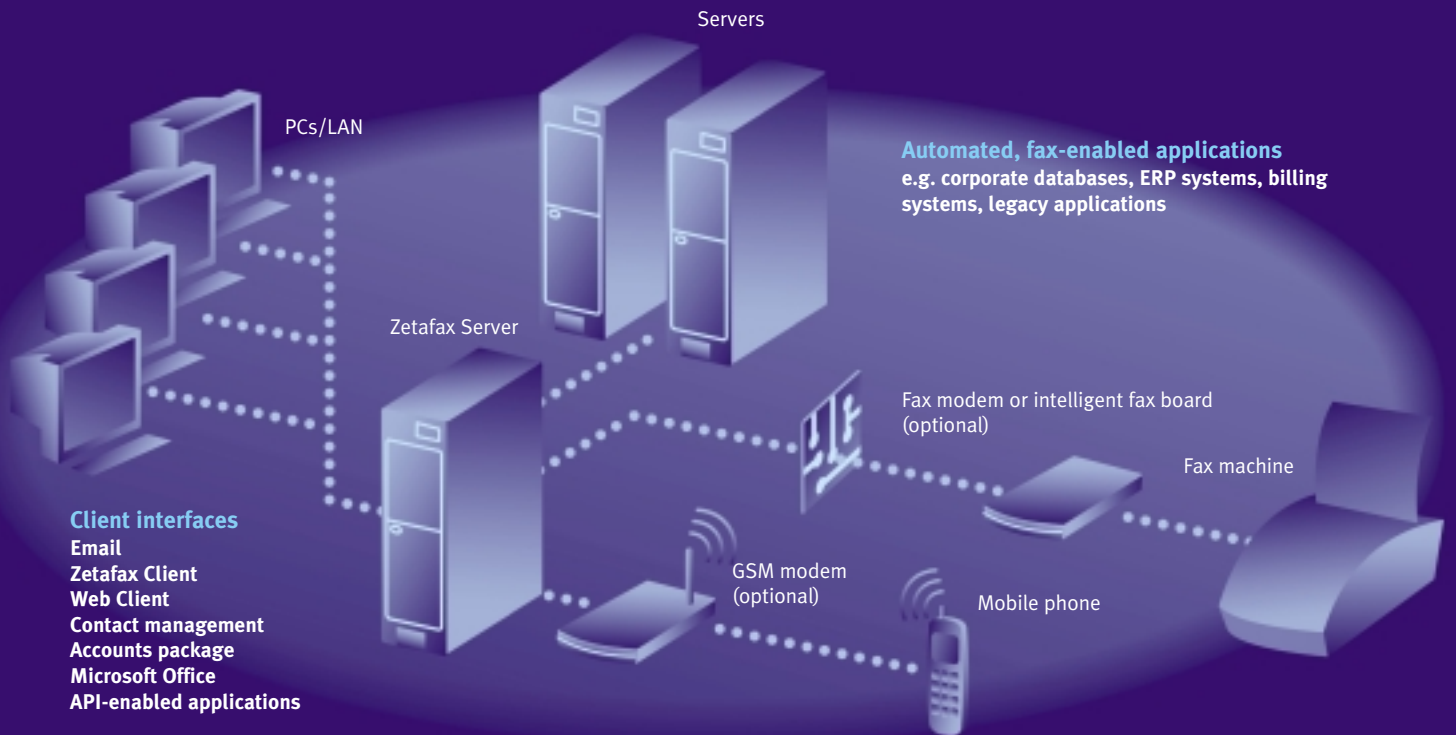

- Broadcast fax capability with advanced embedded addressing for easy management and personalization
- Delayed 'off-peak' faxing feature to save call charges
- Multi-doc feature for combining multiple documents into a single fax
- Option of extended server-based rendering of up to 225 different file attachment types
- Automatic redial if busy and auto-printing of failed faxes
- Notification of sent and received faxes
- Report writing for monitoring and control of fax use and costs
- Archiving for easy retrieval of sent and received faxes.

Easy installation and administration

- Easy-to-use installation and configuration wizard gets you up and running fast
- Centralized installation using Group Policy makes it easy to install multiple Zetafax Clients from one central location rather than on individual PCs if desired
- Remote monitoring and control of Zetafax server from a single PC
- Fax queue management for aborting or rushing of faxes
- Support for the latest platforms: Exchange 2003, Office 2003, Lotus Domino 6.5
- Windows 2003 certification
- Active Directory integration: Zetafax Client checks Active Directory for the server's location, so no client reconfiguration is needed at the desktop.

Zetafax: fax software solutions for business

Enhance your fax solution further with a range of Zetafax options:

Zetafax SMS Gateway

Send and receive text messages from your desktop with the Zetafax SMS Gateway.

Document Conversion add-on

Enables the Zetafax Server to convert over 225 file types to fax TIFF format, providing enhanced functionality to users of the Web Client, Email Gateway and API.

Software Assurance

For added peace of mind, provides all major and minor upgrade releases, software updates and service packs without charge for 1, 2, 3 or 5 years. First year included in Corporate and Enterprise Editions.

Additional user license packs

Additional user licenses are available in packs of 5, 10, 25, 50 or 100.

Additional line packs

Zetafax Business and Corporate Edition starter systems support 2 fax lines as standard. More intensive or frequent use such as fax broadcasting or supporting large numbers of users may require additional fax line support. Zetafax Enterprise Edition supports unlimited lines.

API Toolkit

Integrate Zetafax with your existing software systems such as accounts, purchasing or CRM.

Corporate Edition add-on

For customers with less than 50 fax users who also require Least Cost Routing, Exchange cluster support and Windows child domain support. Software Assurance is not included.
